

Capital Waste Recycles!

Material gets dumped onto the sorting floor and pushed onto conveyors.

Our staff sorts through all the commingled waste.

Capital Waste, Inc.'s recovery facility moves selected waste streams across a conveyor enabling sorters to pull recyclable waste such as paper, cardboard, wood or metal from the waste stream. **The Benefit:** Capital Waste is able to recycle materials, avoid landfill cost, reduce transportation costs, provide stable pricing to customers in these tight economic times and provide added benefits to our customers.
